

# WHAT WE'RE ABOUT

*College Heights Construction courses can be the first step in your journey to a successful in demand career!*

Construction Technology opens the door to approximately 50 different apprenticeship related trades. With a main focus on teaching students to operate equipment in a proper and safe manner, many of the skills learned are transferable to several career choices and different facets of life. Join us and discover your talent!

UPPER GRAND DSB

## GRADE 9

Grade 9 Exploring Technologies is an introductory course allowing students the opportunity to rotate through a variety of hands-on technological education courses. Throughout the course students will use a variety of tools and equipment designed to cultivate skill, competence and interest as they embark on a journey that will become their high school experience.

## GRADE 10

In grade 10 students will begin to choose specific Technological Education courses based on their interests and skills. These courses could be the start of a career direction or just a stop along the way. Students will not only continue to develop abilities but also uncover new ones through a series of projects designed to uncover their strengths.

## GRADE 11

Double credit courses and Specialist High Skills Major program are just two new opportunities open to grade 11 students; allowing those who are ready to further specialize their education in a particular career direction. Woodworking projects may include benches, chairs, tool cabinets and in some cases, a chance to choose their own projects!

## GRADE 12

Grade 12 introduces students to dual credit college programs as an additional option. It also looks to expand the already established skills students have developed in previous courses. Possible projects in grade 12 may include guitar/music stands, lamps, wine racks and electric guitars.

## JOB OPPORTUNITIES

There are many job opportunities in the woodworking industry and these are just a few:

### Cabinet Maker

*Makes and installs cabinets, built in units and much more*

### General Carpenter

*Builds all aspects of residential construction*

### Cement Mason

*Installs foundations, concrete floors and more*

### Roofer

*Installs all forms of roofing material*
