

DENTAL SCREENING AT YOUR SCHOOL

Great news! We are coming to your school!

Public Health will provide dental screenings on _____ for students in JK/SK, as well as grades 2 and 4. We will also be screening grade 7 (time-permitting) as well as other students as appropriate. Screenings are provided as per the Ontario Public Health Standards (2018, or as current).

What is a dental screening?

A screening is a quick look in the mouth by a Registered Dental Hygienist. A sterilized dental mirror and protective vinyl gloves are used for each child. This screening is not meant to replace a full examination by your family dentist. Parents are notified if there is an area of concern or an urgent dental condition is found.

Why are dental screenings important?

Screenings identify children who have dental problems and help them get dental care. Screenings also provide statistics about the dental health of children in our community, which helps identify dental programs that may be needed.

If your child is not in one of the grades listed and you would like them screened, or if you don't want your child screened at school, please call us at 1-800-265-7293 ext. ____ and leave a message:

- ✓ **At least one week before the date of our visit.**
- ✓ **Leave your child's:**
 - **full name**
 - **school**
 - **birth date**
 - **grade**

What free dental services are available at Public Health?

Public Health offers free dental services for children and youth 17 and younger whose families cannot afford dental care. Call us to learn more about our free dental programs or to book an appointment.
