

School Protocol for Students/Staff with COVID-19 Symptoms

Identified student/staff with COVID-19 symptoms

*Schools need to designate a staff member to care for students identified at school with COVID-19 symptoms
 **The isolation room should be an enclosed space separate from other people that is equipped with hand sanitizer, tissues, and a lined garbage bin. It should be cleaned and disinfected after use.
 ***Siblings at other schools may complete their day if asymptomatic, but must remain home after that – see *Return to School Protocol for Students with COVID-19 Symptoms*
