*Vice Principal*

Dear Parents/Guardians,

This year, our school will have regular visits by an occupational therapist (OT) from ErinoakKids Centre for Treatment and Development.

OTs are health care providers who use their skills to help students join in school and learning activities. The OT may visit the classroom, gym or playground to work with the school team to support classroom needs. The OT can work on activities with the class like printing and cutting and following classroom routines.

In some cases, a child may need more specific OT support. The teacher may ask the OT to observe your child to see if OT service would be helpful. The teacher will speak to you before making this request.

The teacher will ask for your consent if an OT referral is needed. Service may include one to one or group sessions and home activities.

You can find OT workshops and resources at [erinoakkids.ca](http://erinoakkids.ca). Please contact ErinoakKids at 905 855 2690 ext. 1 if you have any questions.
