

School Messenger App

Dear Parents and Guardians,

We are pleased to announce that we will be using a new parent communication service called School Messenger App. The School Messenger App allows teachers and school administrators to quickly send messages to groups of parents or to individual families directly to their phones.

To receive messages from our school, download the School Messenger App from either the iTunes store or Google Play Store for Android phones. This app is free and easy to install. Once installed create an account using the email or phone number on record at our school.

For instructions on how to start using this new service, visit our website, <https://www.ugdsb.ca/parents/school-messenger-app/>. We have posted instructions and links on our site to help you get started.

Thanks,

Mr. Darren Hale
Laurelwoods Elementary School
