

## **Infrastructure Services**

May 9, 2022

Dear Neighbours and Businesses,

Please be advised that the Orangeville Standpipe located on Commerce Road will undergo a complete rehabilitation in the Spring and Summer of 2022. The Standpipe supplies water at a controlled pressure and fire flow to a significant number of homes and businesses within the downtown area. The work will involve replacement of the protective lining and coating systems, safety upgrades for operators and the installation of a hydrodynamic mixing system.

To accommodate the upcoming work, the Standpipe will be removed from service for approximately 4 months. While a section of Commerce Road, immediately adjacent to the Standpipe will be occupied by the Contractor for duration of construction activities, safe passage to the school and residential area will be maintained at all times. Completion of the rehabilitation work is expected in early Fall of 2022.

Residents may notice slight changes in water pressure over the construction period, however, no significant impacts are expected. Any concerns should be communicated to the Town's Public Works Clerk at 519-941-0440 ext.4520. Project updates will be provided on the Town's website.

Please contact me at 519-941-0440 ext. 2292 or [spihel@orangeville.ca](mailto:spihel@orangeville.ca) if you have any questions relating to the upcoming work.

Regards,

Sarah Pihel, C.E.T.  
Project Technologist, Infrastructure Services
