

February 3, 2023

Dear Parents/Guardians:

We are pleased to share that the new well was connected to Primrose ES on last Friday's PA Day. The first Ministry required water sample test was completed and cleared Ministry requirements. 'Hand washing only' signs will remain posted until our second water sample test has been approved. The water tanker will be removed in the coming weeks and any site repairs that we were unable to complete due to the weather will be completed during the spring/summer months.

Unfortunately, the water from the new well has a high sodium content. The School Board is exploring a permanent solution for the taste of the drinking water and we will continue to provide drinking water dispensers throughout the school.

Have a great weekend!

Sincerely,

Belal Taha
Superintendent of Education
