

# HOME INTERNET INFORMATION

UGDSB recognizes the requirement for students and staff to have reliable access to the internet to take full advantage of the online component of our Distance Learning Programs. We also recognize the significant challenges many of our families face in accessing reliable internet services due to availability, reliability and affordability. Additional challenges currently include the fact that tele-communications services are very strained at the moment with backlogs for installations and a lack of inventory as significant issues (e.g., Rocket sticks).

The following local internet suppliers have provided options for families to help them participate as fully as possible in our distance learning programs given their individual circumstances. If interested, please contact suppliers directly.

## Rogers Ignite Broadband (Residential)

1-866-618-6066

- Ignite Self-Install: Safe, no-contact home delivery and easy installation for your Ignite TV and Internet services. You stay in and we'll take care of the rest outside your home!
- Ignite WiFi Hub™: Manage and help protect your WiFi network from anywhere with a streamlined app and website. Now included with Ignite Internet and Ignite Bundles.
- Ignite WiFi™ Gateway Modem Rental

Service	List Price	Promo
150u* Ignite™ Internet Only	\$94.99	\$64.99
150u* Ignite™ Internet & TV	\$124.99	\$94.99

\*Rogers is waiving data overage fees for home internet usage starting March 14 until May 31, 2020

## Wightmans

1-888-477-2177

For families who are struggling, Wightman can increase the bandwidth for existing residential customers (this can be done remotely).

\*Wightman would not charge customer for the increase bandwidth for 2 months.

Unfortunately at this time, Wightman is unable to construct fibre, or dispatch a technician to install "new services". As a result they are only able to work with existing fibre internet customers.

## Bell

To see if Bell is available in your area, visit the following link and click on the "Check Availability" button:

[https://www.bell.ca/bell\\_internet/internet\\_access#INT=Search\\_SearchResults\\_Title Link](https://www.bell.ca/bell_internet/internet_access#INT=Search_SearchResults_Title Link)

Consider the Bell Fibe 150 or Bell Fibe 50 services.
