

## **New Pedestrian Crossover in the Waverley Drive Public School Neighbourhood**

A new pedestrian crossover was installed in the Waverley Drive neighbourhood over the summer. The crossover is located on Woodlawn Road East at Atto Drive. A map showing the location of the crossover is on the next page. These crossings are different from typical crosswalks.

The crossover has the following features:

- Ladder style crossover pavement markings
- Sharks teeth yield lines
- “Stop for pedestrians” traffic signs

### **Crossover rules and tips for pedestrians:**

- Make it clear that you want to cross the road, make eye contact and ensure drivers and cyclists see you
- Make sure drivers and cyclists have enough time to stop, and have fully stopped, before you cross

### **Crossover rules and tips for drivers and cyclists:**

- Watch for pedestrians waiting to cross the road and make eye contact
- Stop for pedestrians at the yield line of shark teeth (a line of triangles)
- Allow pedestrians to clear the **entire roadway** before proceeding (note that intersections with crossing guards require motorists and cyclists to wait until all pedestrians and the crossing guard have cleared the entire roadway before proceeding)
- Do not pass other vehicles within 30 metres of the crossover
- Cyclists who wish to use the crossover to cross the roadway must dismount and walk their bike

Click [here](#) for more information on pedestrian crossovers.

This map shows the location of the new crossover.
